ABSTRACT

Data on the application and enrollment patterns of transfer students at the undergraduate level at the State University of New York (SUNY) are presented. The basic statistics show the relation of the transfer student's prior institution, current SUNY institution, and entry level. This information is provided by individual institution, institutional type, and coordinating area. Additional statistics are provided regarding transfer student trends, the relationship of the associate degree to transfers, and the admissions success of transfer students. Tables presenting institutional summaries cover senior colleges, university centers, university colleges, health science centers, specialized colleges, statutory colleges, two-year colleges, agricultural and technical colleges, and community colleges. Separate sections focusing on the institution attended prior to transfer provide information on student transfers from other SUNY institutions, other New York State institutions, and out-of-state institutions. Trend data are also provided with respect to full-time undergraduate credit course transfer students at senior institutions; transfer to SUNY senior institutions from SUNY two-year colleges; and enrollment of first-time, transfer, and continuing and returning students. A brief narrative summary of the data is included. (SW)

PREFACE

This is the 15th annual study of the application and enrollment patterns of University transfer students developed by the Central Staff Office of Institutional Research. The study was conducted in response to the many requests for information regarding the inter-campus mobility of students attending institutions under the program of the State University of New York.

Because of the importance of reliable information regarding transfer students for regional and system-wide planning and inter-institutional cooperation, the data gathered for this study have been organized and presented in a variety of formats designed to provide immediate answers to a wide range of questions which may be formulated regarding transfer students. The basic data are presented so as to directly relate the transfer student's prior institution and current SUNY institution and entry level. This information is provided for individual institutions, institution types, and institutions by coordinating area. Additional information is provided regarding trends in transfer students, relationship of the associate degree to transfers, admissions success of transfer students and other related information.

The acquisition of the data contained in this study involved a great deal of work on the part of the individual institutions. We appreciate the cooperation and effort required to provide these data. We would particularly like to thank our professional, statistical and typing staffs whose efforts made this report possible.

INTRODUCTION

Transfer students defined

Because of the conventional use of the term 'transfer students' and because different sources of transfer data may exist, the definition of transfer students used for this study is of special importance. Transfer students are herein defined as those undergraduate students who were enrolled at a State University institution for the first time in a given Fall term, but who had attended other colleges or universities prior to the given Fall term. With this definition, we have transfer students moving from two-year to other two-year colleges, from senior to other senior institutions, from senior institutions to two-year colleges, as well as from two-year to senior institutions. Even if no credits were transferable, albeit an uncommon case, the student moving from one institution to another would be a transfer student.

Students who simply change majors at the same institution are not considered transfer students in this study. Graduate students are not included in this study. The New York State College of Veterinary Medicine and the State College of Optometry which offer only graduate programs, are not included in this report.

The number of transfer students reported here is an understatement because of the difficulty some institutions have in obtaining background information on those students who are not admitted to specific degree programs by application. For example, in Fall 1984 there are 4,913 transfer students (17.2 percent) whose previous institution is unknown. There are undoubtedly many others who are not even known to be transfer students, but these are not likely to be seeking admittance to a program.

Design of the study

Transfer student studies can be designed to follow identified students longitudinally, observing their success patterns. The investment of effort and time required for such studies would be substantial, given the size and complexity of the State University of New York. For this reason, a different approach was used in this study.

The paradigm used here was the analysis of the higher education backgrounds of transfer students enrolled in the various levels of the institutions under the program of the State University of New York. Some types of conclusions cannot flow from such a study; e.g., students who were unsuccessful in obtaining transfer acceptances anywhere in these institutions are not included even though they were formerly enrolled at one of the institutions included and may have graduated in University-parallel programs. Therefore, this study is based on an input model, not a true follow-up model.

Differences between this study and data from the Admissions Processing Center

The data from the Central Staff Admissions Processing Center (A.P.C.) does not correspond with the data of this study. The major difference is in the populations surveyed. Several institutions under the program of the State University of New York do not participate with the A.P.C. and consequently the data collected by A.P.C. is not system-wide. This report, however, includes system-wide data for all undergraduate institutions under the program of the State University of New York. The census date for the collection of data also differs. The data included in this study shows enrolled students at a specific time after classes have started and enrollments have stabilized.

Regional statistics

The articulation of transfer students is an important consideration in regional planning and cooperation among the institutions of the State University. This report includes an index of State University institutions by coordinating area. In addition, data on the educational background and placement of transfer students, undergraduate admissions and enrollment data are provided by coordinating area.

SUMMARY OF DATA

General Findings

A total of 28,583 transfer students enrolled in the State University of New York in the fall of 1984. This represents a small increase from the previous fall, but more generally it is indicative of the relative constancy in transfer enrollments over the past nine years. This consistency is reflected not only in the overall number of transfer students, but also in the relatively small variability that is seen in the distribution between the senior or two year institutions and in the percentage of students coming from the various sources of transfer students.

The following table shows the distribution of transfer students between the senior and two-year institutions:

Fall term	Total transfer students reported	Percent enrolled at Senior Institutions	Percent enrolled at Two-year Colleges
1984	28,583	62.3	37.7
1983	28,229	61.6	38.4
1982	29,203	62.5	37.5
1981	30,353	61.1	38.9
1980	29,294	62.9	37.1
1979	27,340	64.2	35.8
1978	27,075	62.0	38.0
1977	26,702	61.0	39.0
1976	25,218	62.8	37.2
1975	27,320	64.6	35.4
1974	26,536[a]	66.4	33.6

[a] Data adjusted to exclude transfer students at the Community Colleges sponsored by the New York City Board of Higher Education.

Since the fall of 1976, the percentage breakdown has been roughly, 62% and 38% for senior and two year institutions respectively with only 1979 differing significantly from this pattern.

The stability by source can be seen on tables 85/900 & 85/901 on pages 239 thru 242. The only major shifts that have occurred since 1976 are a decline in the number of transfers between SUNY senior institutions and an increase in the number of transfers falling into the Other or Previous Institutions Unknown categories. These shifts may actually reflect the changes in our data collection procedures (the shift from manual to electronic reporting) and therefore may not reveal an actual change in the transfer population. The Student Data File has made it possible to obtain more accurate and timely data and as a result the students who were once assumed to be coming from other SUNY institutions are now found to be falling into other categories.

In the fall of 1984, transfer students were rather evenly split between SUNY and non-SUNY sources. (50.08% and 49.92% respectively) The percentage from other SUNY institutions increases to 58.68% if only full-time students are considered and it jumps to 64.1% if limited to full-time transfers enrolling in senior institutions. The following table show the basic composition of transfer students by institution type and source.

From a SUNY institution		50.1%
From a non-SUNY institution		32.7%

Concluding Remarks

A study of this complexity will undoubtedly raise further questions and lead to more insight about the extent and nature of student mobility to and within the State University of New York. It is hoped that the basic information will be useful and that on the basis of these and other data, more students can find ways to further their search for appropriate and rewarding educational experiences.
